

CAPABILITY STATEMENT

Company Overview

IB Logistics LLC is a small, veteran-owned, consulting firm specializing in management and information technology solutions for transportation and logistics.

DUNS 016149564 CAGE 1UMD9 SAM C43JEX25B326

Mission Areas

- › Department of War Transportation Systems
- › Financial Improvement & Audit Readiness (FIAR) for Transportation
- › Workflow Management
- › Cyber Security
- › Cloud Computing

Featured Clients

▶ AF Materiel Command – AFMC/A4RT

Comprehensive transportation program support. Created the Logistics Tools Suite (LTS), a system of systems that facilitate logistics and transportation processes across the Department of War. IBL also provides near real-time visibility of financial execution for all USAF Transportation accounts.

▶ Defense Logistics Agency

Transportation financial program support. Services include weekly accrual reports with assurances of SOC 1 Type 2 examination by an independent public accountant. Also included are a variety of products for managing DLA's Third-Party Payment System(TPPS) implementation

Business and Logistics

- › Business Process Improvement
- › Business Intelligence
- › Performance Metrics
- › Supply and Value Chain Management
- › Transportation Management
- › Financial Management
- › Cost Recovery Audits
- › Cost and Data Analysis
- › Project Management

Information Technology

- › Application Development
- › System Architecture
- › Software Architecture
- › Security Assessment
- › Database Architecture
- › Data Modeling
- › Intrusion Detection
- › Capability Planning
- › Topology Planning

Areas of Excellence

› Subject Matter Expert

- Specialized expertise in Department of War logistics, transportation, financial accountability, and mission-critical information systems
- Proven ability to modernize enterprise logistics systems through software engineering, cybersecurity, data analytics, and process improvements that increase mission effectiveness

› Agile Development

- Employs DevOps and Agile methodologies to accelerate software delivery, automate development processes, and improve solution quality
- Delivers resilient, mission-ready applications through continuous integration, automated testing, rapid deployment, and collaborative development

› Cloud Computing

- Designs and manages secure, scalable Microsoft Azure cloud solutions that improve performance, resilience, and operational efficiency
- Optimizes cloud infrastructure through secure integration, cost-effective architecture, and reliable service delivery

› Cybersecurity

- Protects Controlled Unclassified Information (CUI) and Federal Contract Information (FCI) through CMMC 2.0 and NIST SP 800-171 compliant cybersecurity practices
- Secures DoD information systems against evolving cyber threats while maintaining compliance and SPRS readiness

Significant Projects

› TPPS Processing (TrackerLite)

› Transportation Program Support

› Air Clearance Authority (ACA)

› Transportation Funds Controls

› DODAAC Web Management System

› Reusable Container Program (RCP)
